## Article on Environment

Environment, in the literal sense, means the space or situation that surrounds a being. It also refers to the conditions and circumstances in which something or someone's growth is influenced. The article discusses the main aspects of the

environment and the importance of preserving the environment. Go through the topics below to have a better understanding.

## The Environment and Its Impact on Life

The environment is the basic life support system for all living things on planet Earth. It is a combination of natural and human-made components. Natural components include air, water, land, and living organisms. Roads, industries, buildings, etc., are human-made components. The natural environment can be differentiated into four main components – Biosphere, Lithosphere, Hydrosphere <sup>1</sup> and Atmosphere. The topmost layer of the Earth is called the Lithosphere, which is a thin layer of soil made of rocks and minerals. The hydrosphere consists of various types of water bodies like seas, oceans, rivers, lakes, ponds, etc. Atmosphere, consisting of water vapor, gases <sup>2</sup> and dust particles, is the layer of air that surrounds the Earth. The living world consisting of human beings, plants <sup>3</sup> and animals constitute the biosphere.

The environment is dependent on the interaction between all the different components. However, human beings play a huge role in the making and breaking of the environment. Being the supreme most intellectual power on Earth, human beings influence the wellness of the environment to a great extent. The impact of the environment on all living beings is directly

proportional to the way human beings treat the environment. Any kind of existence would not be possible without air, water or land. Nothing to eat, not a drop to drink and nowhere to go is not what we or our future generations should expect to have. Every living thing depends largely on the environment for survival, and having a clean and safe environment is solely in the hands of the human beings.

## 200 Words Article on Environment

The Earth's environment makes Earth the only planet on the solar system where life and sustainability is possible. From the beginning of time, the Earth has provided all the inhabitants of the planet with everything they need for their survival. On the other hand, human beings have exploited all the natural resources for their own selfish needs and have rendered the planet like a barren and ramshackle land.

Human beings are an integral part of the environment and hold a huge responsibility to upkeep the living conditions for their own sake and for the sake of all the inhabitants of the planet, including plants and animals. The balanced management of natural resources and the environment as a whole is crucial for the well-being of all living beings and for the economic growth of the entire world. Managing the use of resources (both renewable and non-renewable) effectively, can help solve the many disputes between countries, states and people for the power to claim at least a part of the resources as their own. It is high time people understand that the health of the environment is vital, and only if the environment is healthy will all living beings have a chance of survival.

## Detailed Article on Environment and the Need to Preserve It

The environment is the fundamental source of all possible existence on planet Earth. However, over the recent years, the environment has been exploited excessively because of which the environmental conditions are becoming worse day by day. Pollution of air, water and land, mining, industrialisation, modern urbanisation, deforestation, release of chemical effluents and landfills are some of the major factors that cause the gradual deterioration of the environment.

It is necessary to conserve the environment in order to protect wildlife and to preserve the different species. With the disastrous pace of climate change, a result of pollution and exploitation of the environment, finding out ways to protect the environment from any further damage should be the first priority. Bringing back the environment to its original state is critically important and is the only solution.

Working towards a common goal will be the easiest and fastest way to keep the environment from any more harm. According to Ban Ki-moon, "Saving our planet, lifting people out of poverty, advancing economic growth... these are one and the same fight. We must connect the dots between climate change, water scarcity, energy shortages, global health, food security and women's empowerment. Solutions to one problem must be solutions for all". This is what we have to act on and look forward to – finding the dots, connecting them and providing solutions.

The leaders of the world are working to reduce the rapid degradation of the environment, and there are organizations like the United Nations who come up with initiatives to create awareness and get people to take actions to curb the problems of the environment. Some of these initiatives include the 2019 Sustainable Development Summit, 2019 Climate Action Summit, 2030 Agenda

for Sustainable Development, <sup>28</sup>Paris Agreement <sup>29</sup>and many other programs that include river conservation, afforestation, coastal management, wetland conservation <sup>30</sup>and so on. While all these measures are in action, individuals are also obliged to take steps to preserve the environment that everyone is a part of. With everyone's efforts, we can be sure that all of it will <sup>31</sup>definitely make a difference and help the environment <sup>32</sup>in becoming healthy and sustainable.

## FAQs on Environment

Q1

### What is the environment?

Environment <sup>33</sup>basically refers to the surroundings you are in. It is the most fundamental support system for all forms of life on planet Earth. The environment provides us with the <sup>34</sup>basic necessities of life such as food, water, air <sup>35</sup>and shelter.

Q2

### How do we protect the environment?

Protecting the environment depends on every individual's attitude towards it. In order to <sup>36</sup>protect the environment, we can start conserving water, using all resources effectively, educating oneself and others about the urgent need to preserve the environment, planting trees <sup>37</sup>and so on

Q3

## What are the initiatives taken by the Government to protect the environment?

The Indian Government has taken various measures with a view <sup>38</sup>of protecting the environment and preserving it for <sup>39</sup>our future generations. Some of them are Project Tiger, Swachh Bharat Abhiyan, Green Skill Development Programme, Special Purpose Vehicle for Afforestation, Clean Development Mechanism, Fly Ash Utilisation Action Plan, etc.
